

PPE-PS

Alternative Designations

Key Features

Polyphenylene ether - Polystyrene

Ductile • Resistant to impact • Strong • Good flow ability

Description

This polymer is a blend of polyphenylene ether and polystyrene. It is highly ductile and exhibits good resistance to impact and good surface appearance. It has low moisture absorption and is dimensionally stable. Its tensile strength goes up to 50 MPa at room temperature. It is typically used for valve components, water pumps and medical devices.

Mechanical Properties

Thermal Properties

Tensile modulus	1650 MPa	Heat deflection temperature (1.80 MPa)
Tensile strength	50 MPa	Heat deflection temperature (0.45 MPa)
Elongation at break	30%	Softening temperature
Flexural strength	74 MPa	
Flexural modulus	2.2 GPa	

89

Physical Properties

Hardness (Shore D)

Density	1.12 g/cm ³
